GAIL SCHONTZLER, Chronicle Staff Writer

Somewhere in the Milky Way galaxy, far, far away, baby stars are being born, and two Bozeman High School students have spent months working to uncover some of their mysteries.

Hannah Cebulla and Maddie Kelly just returned from a trip funded by NASA to present their research at the American Astronomical Society's January meeting in Washington, D.C.

More than 3,000 scientists, professors, graduate students and college undergraduates attended – along with a handful of high school students.

"It was fantastic," said Kelly, 17, a senior. "They were really impressed with the work we were able to do at our age."

"For me it was real cool to see everybody's hard work," said Cebulla, a junior. "Everybody is so excited to see everybody's research."

They were two of about a dozen high school students from Connecticut, Virginia,
